

Activity 7: Tracing with Pen, Pencil, and Shapes!

Time: Twenty minutes

Goal: Explore important tools (*pen, pencil, shape, and area type tools*) and learn to trace in Adobe Illustrator!

Activity:

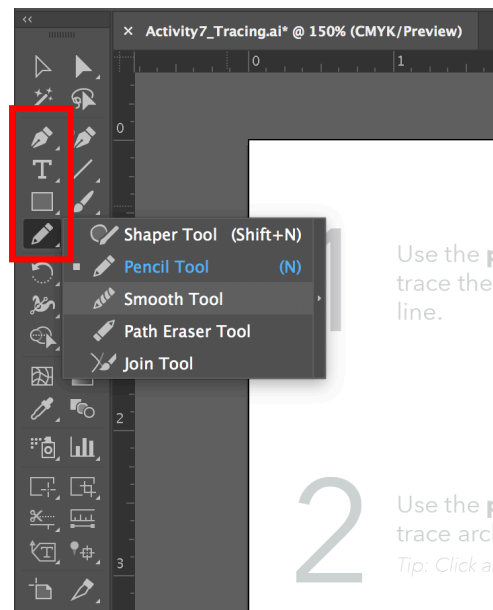

1. Download Activity7_Tracing.ai from Canvas and open.
2. Take a look at the layers. Keep the Template layer locked!!
3. Using the *Pen, Pencil, and Shape tools*, trace the template features using a black line with a 1-point stroke. Trace as closely to the template as possible!

Make sure all of your tracings are in the Tracings layer. To do this, click the layer before selecting your tool to trace. Remember you can always drag your tracing into the Tracings layer if it ends up elsewhere!

Tips and Tricks: Check out the hidden tools underneath the tools in the left panel! Click and hold to expand tool selection.

In this activity, we'll focus on four tools: Pen, Type, Shape, and Pencil.

Tip: Click and hold to expand tool selection underneath each tool!

Submit: Submit your Adobe Illustrator file to Canvas!
